Dear Sir or Madame,

I could describe myself as ambitious, determined and open-minded person with having high level of responsibility. My calm and self-confident appearances, as well as a very strong solution orientation characterize me. From my early childhood I have always been situated to different cultures, ways of living and different ways of thinking due to the job of my father, who has been an officer in Turkish Army, we have lived in different cities. This exposure did not only enrich me as a person, but it also fostered my entrepreneurial spirit. Furthermore, I have an excellent mother who has been a teacher and who has been representing me through a way which shows that there is always more to learn and develop.

At the beginning of my bachelor degree, I was aware that having valuable experiences and good level in English would provide me better opportunities and future. Therefore I wanted to practice my English in United Kingdom during of my summer holiday in 2015 and I had Advanced Level in English. Now ,as previous intentions of mine , I would like to do more different things to be more achieved and experienced.

Since my childhood, I was attracted by foreign cultures and I was very interested in doing an exchange programme because of the examples around me, especially my brother who studied abroad and encouraged me about it. Depending on this, I have studied two semesters abroad at the Lublin University of Technology in Poland where I had the opportunity to study in a different cultural environment and gain new social experience. This magnificent experience has developed my confidence, leadership talent, analytical thinking, problem solving and responsibility taking character. After finishing my exchange programme, I have come back to my country and I am much more desired to have new experiences and improved skills.

Considering my desire on academic career and character, I am firmly convinced that I would be a productive and successful employee.

Thank you for your precious time and consideration.

Yours sincerely,

Orhan Gökalg Büyükuysal
